

Remarks

Applicant's Attorney hereby states that the change made in the sequence listing does not include new matter. Applicants have amended the sequence listing to add SEQ ID NO:7 and SEQ ID NO:8, amino acid sequences for CeM03D4.1b and HsMKLP1, two proteins disclosed in the specification. CeM03D4.1b and HsMKLP1 are identified in the specification by the GenBank database accession numbers U61955 (protein ID 1397342) (for CeM03D4.1b) and X67155 (SwissProt Q02241) (for HsMKLP1). SEQ ID NO:7 and SEQ ID NO:8 represent the amino acid sequences present as GenBank ID No. U61955 (protein ID 1397342) and GenBank ID No. X67155 (SwissProt Q02241), respectively, at the time of filing of the application, and thus represent the amino acid sequences for the CeM03D4.1b and HsMKLP1 proteins present as the cited GenBank accession numbers at the time of filing of the application.

Applicants assert that the addition of these two amino acid sequences to the application's Sequence Listing does not constitute the addition of new matter because both sequences are inherent in the GenBank database accession numbers cited in the application as originally filed. Thus, support for SEQ ID NO:7 and SEQ ID NO:8 can be found inherently in the specification as originally filed. Support for the addition of SEQ ID NO:7 and SEQ ID NO:8 can also be found in the printouts of the sequences as they existed in the GenBank database at the time of filing of the application, which Applicants submit herewith in a First Supplemental Information Disclosure Statement as Document No. AT34 (GenBank ID No. U61955 (protein ID 1397342) for SEQ ID NO:7 (CeM03D4.1b)) and Document No. AR35 (GenBank ID Number X67155 (SwissProt Q02241) for SEQ ID NO:8 (HsMKLP1)). Applicants also submit in the First Supplemental Information Disclosure Statement printouts from the GenBank database

listing the revision histories for GenBank ID No. U61955 (Document No. AS35) and GenBank ID No. X67155 (Document No. AT35).

Applicant's undersigned attorney has also amended the specification at page 30, lines 19-22, to add the sequence identifier number SEQ ID NO:7 after CeM03D4.1b and the sequence identifier number SEQ ID NO:8 after HsMKLP1, and to direct the entry of this corrected Sequence Listing at the end of the application.

In accordance with 37 C.F.R. § 1.825(b), the paper copy of the substitute Sequence Listing and the computer readable copy of the substitute Sequence Listing submitted herewith are the same.

It is respectfully believed this application is now in condition for allowance. Early notice to this effect is earnestly solicited.

Respectfully submitted,

STERNE, KESSLER, GOLDSTEIN & FOX P.L.L.C.
